Step-1:Brainstorm,IdeaListingandGrouping

Brainstorm & idea prioritization

[Share template feedback](#)

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

Saibalaji SM

- Smart assistance for medicine
- SMS of medicine name
- Warning for scarcity of medicine
- Web application for user registration

Sathish B

- Reminder of pills through audio
- Seeking of medicines
- Mobile application for setting reminder
- Message alert for closest person

Shakthivel S

- Notify on low amount of medicine
- Reminder for patients relation
- Android app for feeding data for alert

Sridharan R

- Application based on health monitoring
- Alert on quantity of medicines
- monitoring the sufficiency of medicine
- Medicine remembrance of voice

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

VOICE ASISTANT

- Smart assistance for medicine
- Voice alert by chat bot
- Medicine remembrance of voice
- Reminder of pills through audio

NOTIFICATION

- Notify on low amount of medicine
- SMS of medicine name
- Alert on quantity of medicines
- Message alert for closest person

WARNING

- Reminder for patients relation
- Alert on quantity of medicines
- Alert on quantity of medicines
- Warning for scarcity of medicine

Step-2:IdeaPrioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes

Importance

If much of these tasks could get done without any difficulty or cost, which would have the most positive impact?

TIP

Participants can use their cursor to point at where sticky notes should go on the grid. The facilitator can position the note by using the arrow cursor. Holding the **H** key on the keyboard.

Smart assistance for medicine

Android app for feeding data for alert

Mobile application for setting reminder

Web application for user registration

Application based on health monitoring

Message alert for closest person

Voice alert by chat bot
